

ABOUT ME

I am a dedicated, enthusiastic, and hardworking individual with a teachable spirit. I am always eager to learn and explore new things, whether in my academics or in life in general. As an IT student, I have developed strong teamwork skills, as we are often required to work collaboratively in groups. I enjoy challenging myself and not limiting my potential. Currently, I serve as a student assistant and actively participate in competitions such as hackathons to put myself out there, enhance my problem-solving abilities, and gain hands-on experience. I am eager to apply my knowledge in a practical environment and continue growing both personally and technically.

Teachers Assistant

Nov 2021 - Feb 2022

- Was part of a team that distributed textbook to every learner in the school using a computer-based system to keep record
- Worked closely with learners I grew to understand and to accommodate them
- Contributed to a positive work environment by supporting and helping my fellow Teachers Assistance in completing their tasks.
